LUMINA

COLLECTION GROUP

Lumina Collection Group specializes in modern outdoor architectural solutions designed for durability, clean design, and low maintenance. From aluminum fencing and pergolas to wall systems, post columns, and turf matt surfaces, our products help create outdoor spaces that feel intentional, functional, and built to last.

www.luminacollectiongroup.com

Outdoor spaces are no longer just **backgrounds,** they are places **where life happens.**

Modern Outdoor Architecture

THOUGHTFUL
Outdoor Design
Built for Real Life.

At Lumina Collection Group, we believe outdoor spaces deserve the same level of care, intention, and design integrity as interiors. Our work is guided by a simple principle: outdoor structures should be functional, visually refined, and built to last. We specialize in modern outdoor and architectural solutions, including aluminum fencing systems, pergolas, aluminum wall panels, post columns, and premium surface alternatives. Each solution is designed to perform reliably while maintaining a clean, contemporary aesthetic. We work with homeowners, contractors, designers, and commercial property managers who value durability, low maintenance, and clarity in both design and execution.

www.luminacollectiongroup.com

Engineered for Every Season

Lumina aluminum pergolas are engineered to withstand harsh outdoor conditions — from heavy rain to intense UV exposure — without warping, rusting, or fading. The lightweight aluminum structure allows for wide spans with minimal column support, opening up your outdoor space. Each pergola is custom-designed and fabricated to your exact specifications. Our team handles everything from initial design consultation through final installation, ensuring a seamless experience from start to finish.

SECTION 01

PERGOLAS

Shade Redefined. Light Reimagined.

PERGOLAS

Where Architecture Meets the Open Sky

Our aluminum pergola systems are engineered to do far more than provide shade. Conceived at the intersection of architecture and art, each structure is custom-designed to complement the proportions, orientation, and character of your property.

Frames are fabricated from high-grade aluminum or galvanized steel—square or round, straight or curved—finished with electrostatic powder coating in any RAL colour, wood-grain effect or anodized finish. The result is a permanent, virtually maintenance-free structure that retains its beauty for decades.

Canopy panels are laser-cut from aluminum sheets in bespoke perforated patterns, controlling light, air flow and privacy in perfect balance.

- **Custom Dimensions**
  Drawn specifically for your site — no standard sizes.
- **Waterproof Options**
  Safety-glass or polycarbonate inserts for wet climates.
- **Integrated LED**
  Hidden lighting transforms the canopy after dark.
- **Wind Resistant**
  Perforations reduce wind load dramatically.

PERGOLA SYSTEMS

Light, Shadow & Sky

The interplay of sunlight filtering through a precision-perforated canopy creates a living visual experience that changes hour by hour. By varying perforation density, hole geometry and panel arrangement, our designers control exactly how much sky, warmth and breeze reach the space below.

In rainy climates, clear polycarbonate or laminated safety-glass inserts provide waterproof coverage without sacrificing the visual connection to the sky. Entrance canopies are individually studied for facade alignment, drainage and the perfect first impression.

PERGOLA SYSTEMS

Enclosed in Gold, Open to the Sky

Floor-to-ceiling glass walls dissolve the line between indoors and out. Gather around a living flame as palms sway beyond your gilded frame — shelter redefined for those who refuse to compromise.

When Night Falls, the Room Begins

Louvered warmth above, a flickering screen ahead, and the grill already singing. Your outdoor living room doesn't close at sunset — it awakens. Engineered for the hours worth staying up for.

A Circle of Light, a World of Your Own

Form sculpted into sculpture. The Arch Series surrounds you in amber radiance, cradled by bold geometric lines that command any garden. Not a seat — a statement that your space is unlike any other.

FENCING SYSTEMS

DEFINE YOUR BOUNDARIES

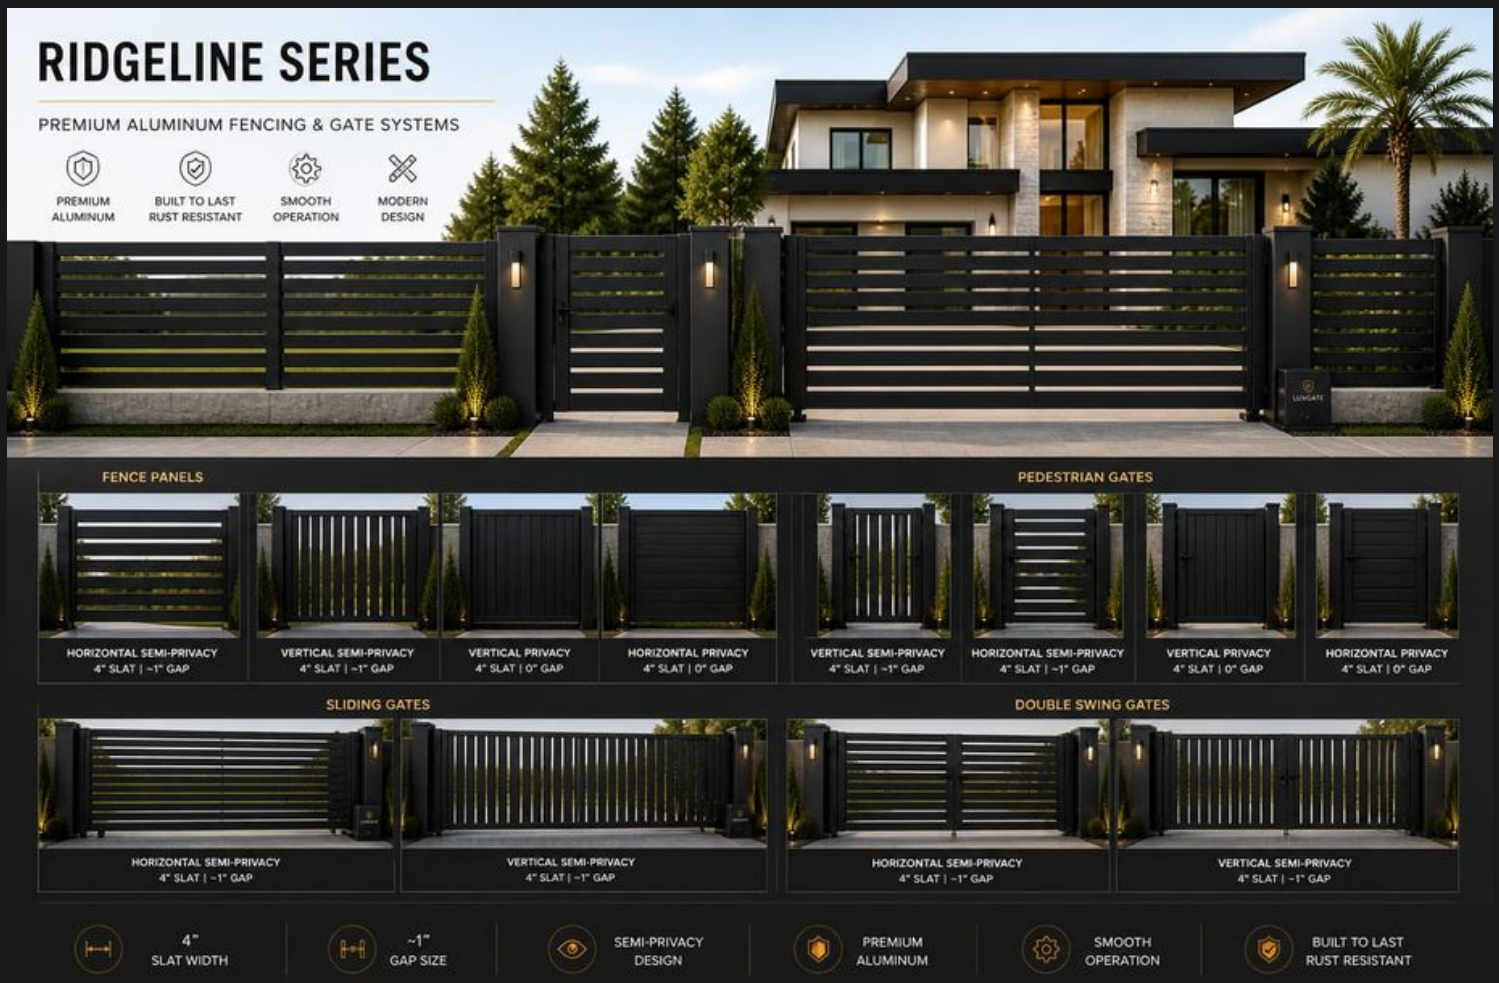
Modern aluminum fencing engineered for privacy, security, and lasting beauty. Choose from our curated series — Ridgeline, Ventura, Linea, Hampton — each designed to complement your home's unique architectural character.

Explore our Collections ⟶

RIDGELINE SERIES

The **Ridgeline Series** offers a bold and structured aesthetic, perfect for homeowners seeking full or semi-privacy without sacrificing style.

Available in horizontal and vertical configurations, each panel is precision-cut from durable aluminum and finished with a weather-resistant powder coat. Whether installed as a perimeter fence or architectural screen, Ridgeline delivers presence and permanence.



Premium Aluminum Fencing & Gate Systems

Redefine your property's perimeter with the Ridgeline Series — a complete premium aluminum fencing and gate system engineered for modern living. Combining clean architectural lines with rust-resistant durability, Ridgeline delivers a seamless blend of security, privacy, and sophisticated design.

Key Features:

- Premium aluminum construction
- Built to last — rust resistant
- Smooth, reliable operation
- Modern, architectural design
- 4" slat width standard across all profiles
- Semi-privacy and full privacy options available

Fence Panels

Available in horizontal and vertical orientations, Ridgeline fence panels come in both Semi-Privacy (4" slat | ~1" gap) and full Privacy (4" slat | 0" gap) configurations — giving you full control over openness and seclusion without compromising on style.

Pedestrian Gates

Designed to complement any facade, pedestrian gate options mirror the panel lineup with Horizontal and Vertical Semi-Privacy and Privacy variants, ensuring a cohesive look from boundary to entryway.

Sliding Gates

Ideal for driveways and high-traffic access points, sliding gate options are offered in Horizontal and Vertical Semi-Privacy (4" slat | ~1" gap), combining smooth, effortless operation with a commanding presence.

Double Swing Gates

Make a grand statement with double swing gate configurations in both Horizontal and Vertical Semi-Privacy profiles — perfect for wide entrances that demand both elegance and functionality.

Clean lines.
Timeless Presence.

The Ventura Series is designed for those who appreciate the interplay of clean horizontal or vertical lines with natural light and landscape. Its semi-open profile creates visual interest while maintaining airflow and sightlines to the surrounding environment.

Available in both **horizontal and vertical** orientations, Ventura series adapt effortlessly to modern and transitional architectural styles. The durable powder-coat finish resists UV fading and weathering, ensuring consistent beauty across every season.

SPECIFICATIONS

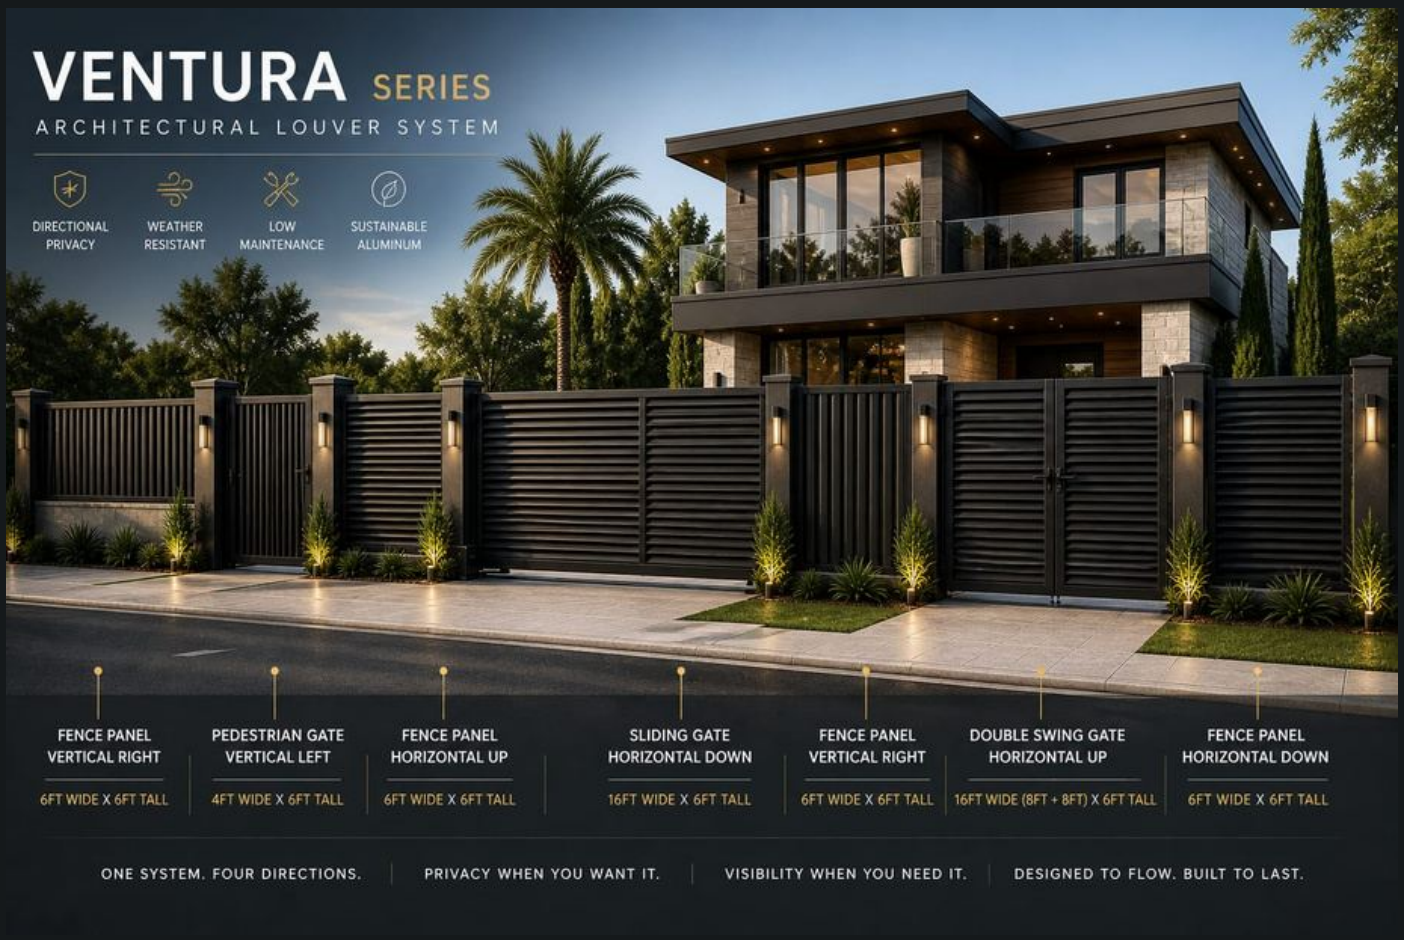
Material:	High-grade aluminum alloy
Finish:	Powder-coated, full RAL range
Profile:	Horizontal & Vertical
Maintenance:	Minimal — no painting required
Application:	Residential & Commercial

Architectural Louver System

Command attention and control your privacy with the Ventura Series — a sophisticated architectural louver system engineered for those who refuse to compromise between visibility and seclusion. With four directional louver orientations across a complete range of fence panels and gate systems, Ventura adapts to your environment on your terms.

Key Features:

- 3" Z Louver profile throughout
- ½" gap for airflow and directional sight-line control
- Directional privacy — angled louvers control visibility by design
- Premium aluminum — weather resistant, rust-free, low maintenance
- Can be cut down to any size — fully customizable to fit your exact dimensions
- Seamlessly integrates panels, pedestrian, sliding, and swing gate type



Fence Panels

Ventura fence panels come in four louver orientations: Vertical Right, Horizontal Up, and Horizontal Down , all in a standard 6ft × 6ft size, and can be mixed and matched for a dynamic, layered boundary wall.

Pedestrian Gates

Perfectly scaled for personal access points while maintaining the Ventura system's signature louver aesthetic.

Sliding Gates

A sweeping, automated-ready sliding gate ideal for wide driveways, delivering smooth operation without sacrificing the series' architectural refinement.

Double Swing Gates

Make a grand, symmetrical entrance with dual swing panels that open with effortless elegance — the statement piece of any luxury property frontage.

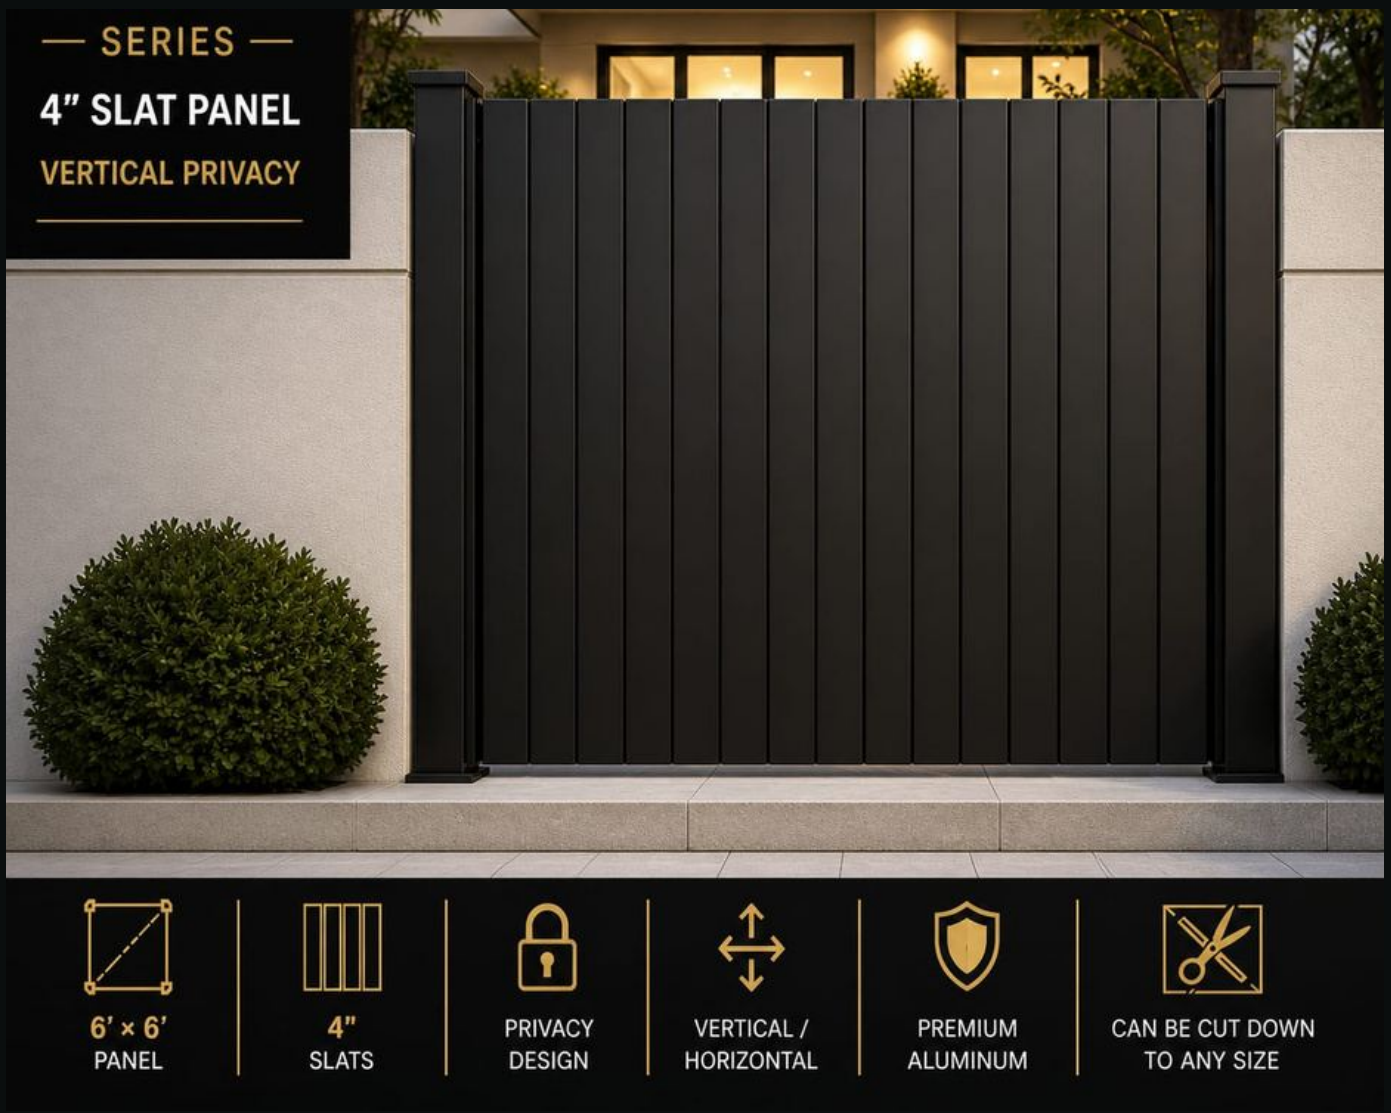
LINEA SERIES

The Linea Series is a complete, cohesive boundary system built around a clean 4" overlap slat profile. Available in vertical and horizontal orientations across full privacy and semi-privacy configurations, every component — from fence panels to driveway gates — is designed to work together seamlessly.



Premium Aluminum Sliding Gate System

The Linea Series combines clean, linear design with serious privacy performance. Available in distinct configurations, it adapts to any property style while delivering the smooth, automated operation modern homes demand.

Key Features:

- 4" overlap slats for a flush, shadow-line finish
- Full & Semi-Privacy options in both orientations
- Vertical & Horizontal slat directions available
- Premium aluminum — rust-resistant, low maintenance
- Can be cut down to any size for a perfect fit

Stand Tall. Stay Private.

The Summit Series offers a refined panel design with exceptional structural performance and timeless aesthetic. It delivers full-privacy aluminium fencing in two commanding sizes — built for properties that demand presence.

Premium Aluminum Fencing & Gate Systems

The Summit Series delivers bold, large-format boundary solutions built around a wider 6" slat profile — creating a more substantial, architecturally confident look compared to standard fencing systems.

Key Features:

- 6" slats — wider profile for a bolder, more substantial look
- Full Privacy & Semi-Privacy options
- Vertical & Horizontal orientations
- Premium aluminum—rust-resistant, weather-proof, low-maintenance
- Can be cut down to any size for custom installations

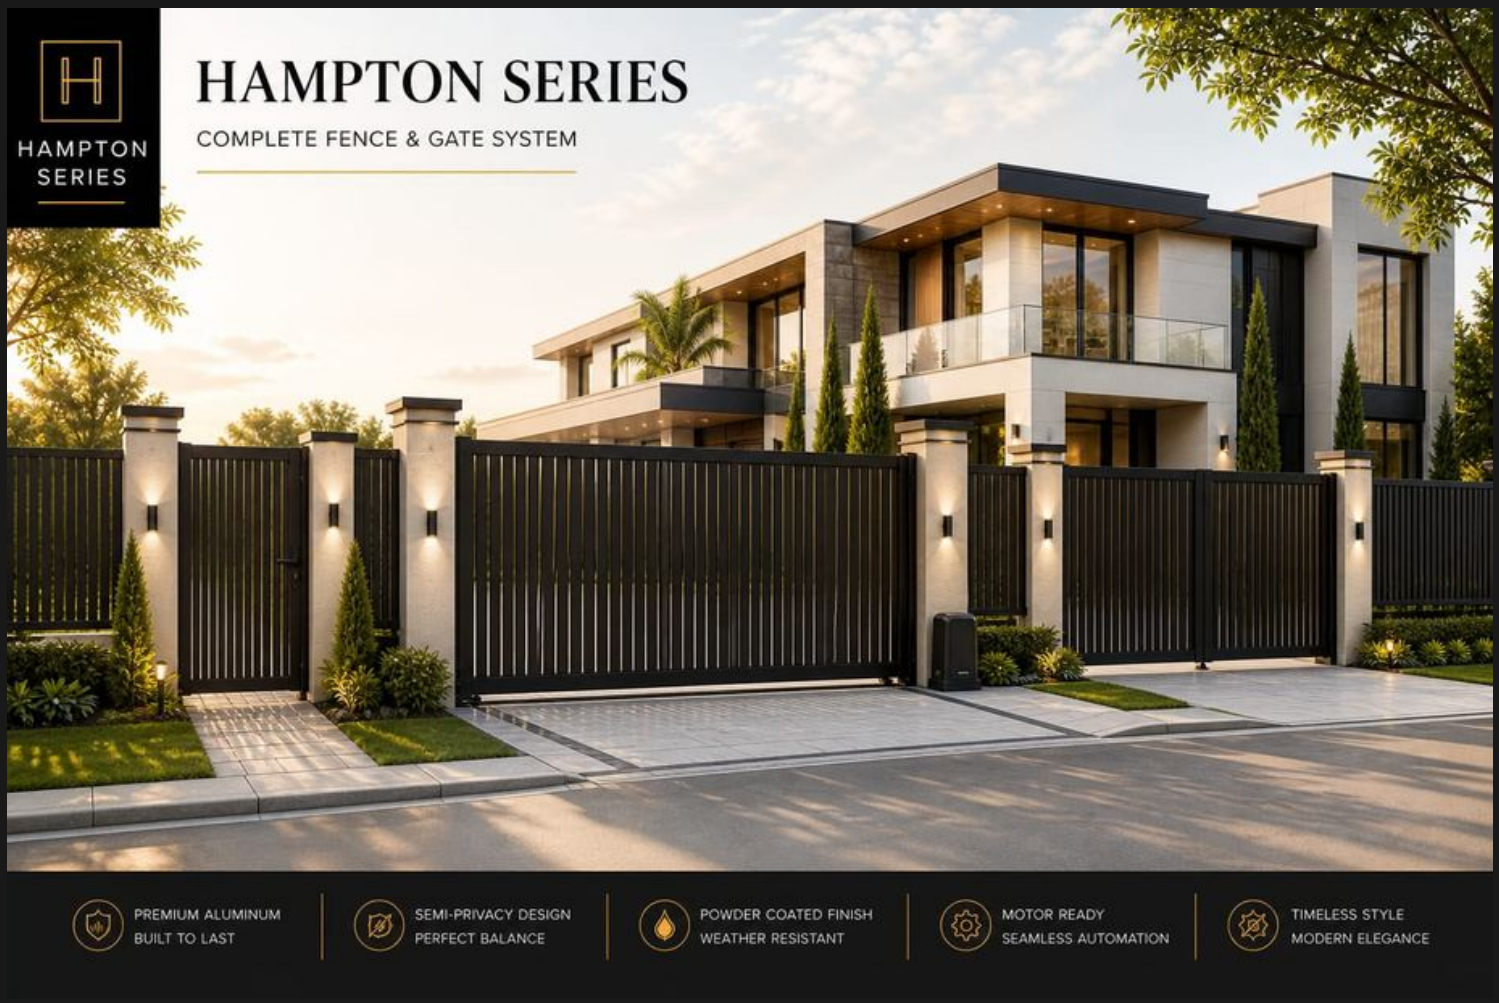
Full Privacy & Semi-Privacy Options

Hampton brings classic proportions to modern aluminum. It delivers a classic, bold horizontal plank appearance ideal for estate and prestige applications. Choose from full privacy or semi-privacy panels in horizontal or vertical layouts. Gates available in sliding and double-swing configurations for a complete system.

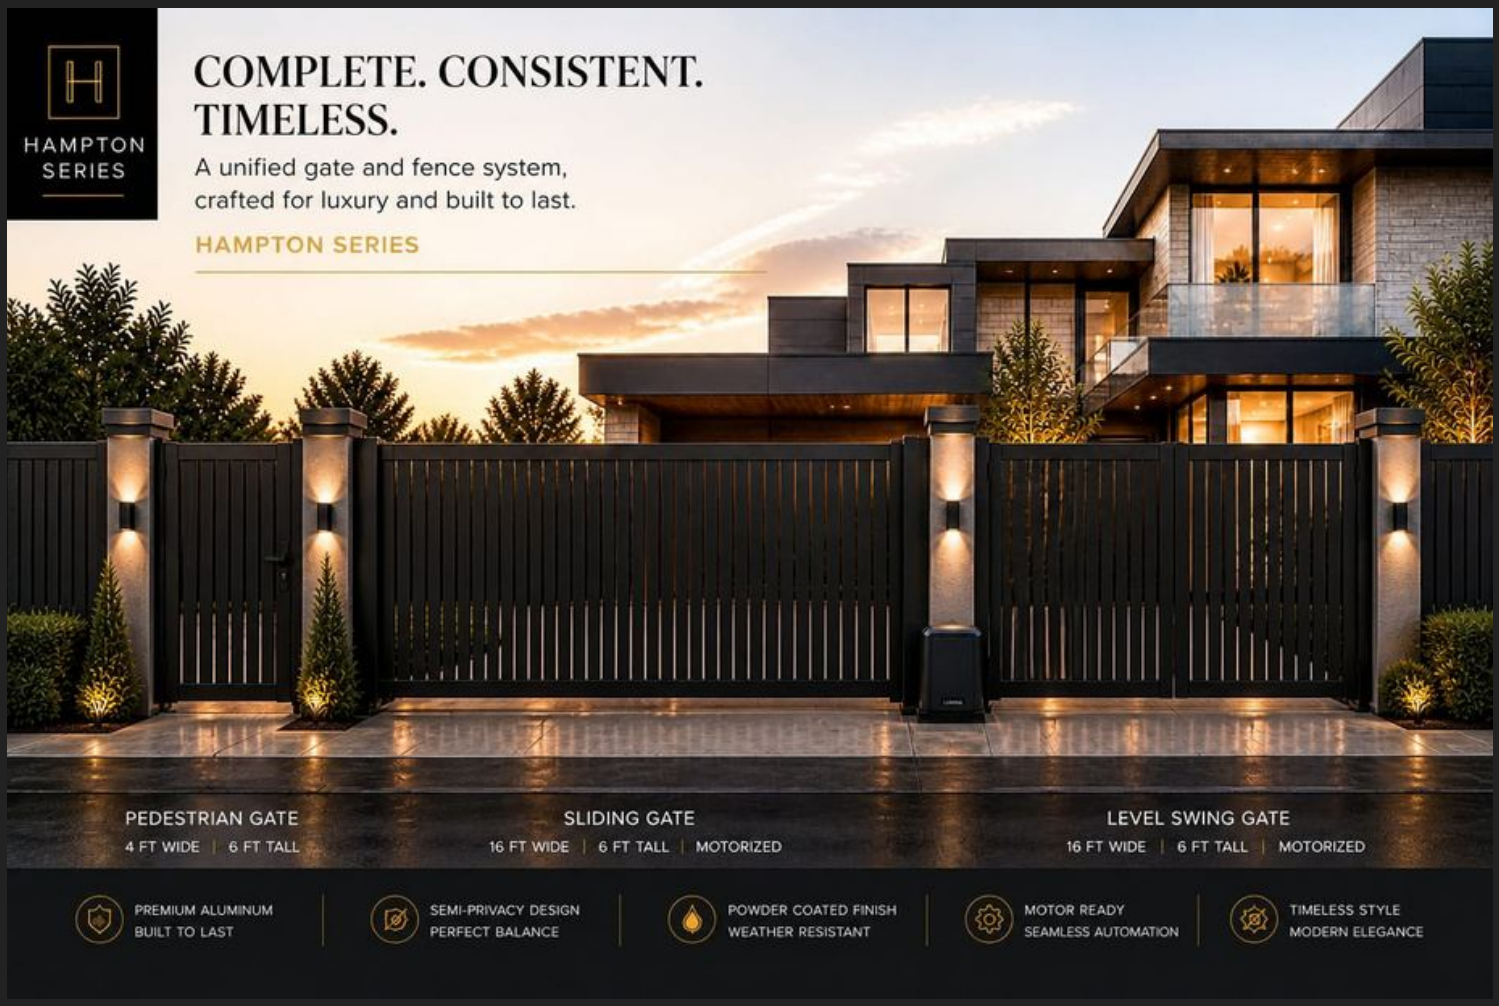


Complete Fence & Gate System

The Hampton Series is where timeless elegance meets modern engineering. Designed for discerning homeowners who demand both beauty and performance, the Hampton system pairs a refined semi-privacy vertical slat profile with premium aluminum construction and a flawless powder-coated finish — creating a boundary that elevates the entire property, not just the perimeter.

Key Features:

- Premium aluminum — built to last, rust and warp resistant
- Semi-privacy vertical slat design — perfect balance of openness and seclusion
- Powder coated finish — weather and UV resistant for long-lasting appearance
- Motor ready — seamless automation with any leading gate motor system
- Timeless style — modern elegance suited to any architectural aesthetic



Fence Panels

Hampton fence panels are designed to flow seamlessly alongside every gate configuration for a consistent, high-end streetscape from end to end.

Pedestrian Gates

A proportionally elegant personal entry gate that matches the fence panels exactly, ensuring a seamless look from boundary to doorstep.

Sliding Gates

A sweeping, automation-ready sliding gate that glides effortlessly on its track. Motor-integrated straight from installation for smart, keyless driveway access.

Level Swing Gates

A grand motorized swing gate that opens with quiet authority. Perfectly level operation and a full 16ft clearance make it the statement entrance for any luxury property.

Complete Gate Solutions.

Lumina Gate Kits provide everything needed for a fully finished, professional gate installation. Each kit is designed to coordinate directly with our fencing series—same profiles, same powder-coat finishes, same design language—creating a seamless boundary solution from post to latch.

Pedestrian kits are supplied in standard 4×6-foot configurations and can be adapted to any Lumina fencing style. Vehicle gate kits are available in single- and double-swing as well as sliding configurations, with automation-ready wiring channels built in. All gate hardware—hinges, latches, drop bolts, and handles—is manufactured from stainless steel or powder-coated aluminum to match your fence finish precisely.

- **All Lumina Styles**
  Gate kits available for every fencing series.
- **Waterproof Options**
  Pre-wired for leading motor brands.
- **Integrated LED**
  Matching hinges, latches and handles included.
- **Wind Resistant**
  Non-standard opening widths available on request.

DECORATIVE PANELS

Where pattern finds its rhythm.

Light plays. Shadows dance. Each Lumina decorative panel transforms an ordinary fence line into an extraordinary architectural feature. Lumina Decorative Panels transform everyday fencing and gates into architectural feature pieces. Each design is CNC-laser cut from high-grade aluminum, offering dramatic light play during the day and a striking backlit effect with garden lighting at night.

Available as stand-alone privacy screens, fence panel inserts, or gate face panels, they integrate seamlessly with any Lumina fencing series. Custom pattern design is available on request for truly one-of-a-kind installations.

DECORATIVE PANELS

All decorative panels available in full RAL palette · Suitable for fence, gate or standalone feature wall applications

SECTION 03

WPC FENCING

Nature's Look. Engineered Strength.

WPC FENCING

Natural Look.
Engineered Strength.

Wood-Plastic Composite (WPC) combines the warmth and authentic grain texture of natural timber with the dimensional stability and resilience of engineered polymer. The result is a fencing material that looks genuinely organic while delivering performance far beyond untreated or treated wood.

Lumina WPC panels are UV-stabilized to prevent fading, moisture-resistant to prevent warping and splitting, and completely termite-proof for long-term structural integrity. Available in a range of timber-inspired tones and plank profiles.

- **Weather Resistant**
  Handles rain, humidity, frost and intense UV.
- **Splinter-Free**
  Safe for bare feet and children's areas.
- **Eco-Conscious**
  Made from recycled wood fibre and polymer.
- **Low Maintenance**
  No staining, oiling or sealing required.

ARTIFICIAL TURF

Lush. Green. All Year Round.

ARTIFICIAL TURF

The Perfect Lawn Every Season.

Lumina's artificial turf range delivers the full visual and tactile appeal of a well-maintained lawn without irrigation, mowing, fertilizing, or seasonal dormancy. Used in residential gardens, rooftop terraces, commercial courtyards, playgrounds, and sports applications.

Available in a range of pile heights, blade widths, and color blends—including multi-tone mixes with thatch layers for a truly natural appearance. Each roll is manufactured to exacting standards for UV stability, drainage, and underfoot comfort.

1

No Watering

Eliminate irrigation costs

2

Pet & Child Safe

Non-toxic, soft, easy to clean.

3

Excellent Drainage

Handles heavy rainfall without pooling.

4

UV Stabilized

Color-fast across years of direct sun.
