LUMINA

COLLECTION GROUP

Lumina Collection Group specializes in modern outdoor architectural solutions designed for durability, clean design, and low maintenance. From aluminum fencing and pergolas to wall systems, post columns, and turf matt surfaces, our products help create outdoor spaces that feel intentional, functional, and built to last.

**Outdoor spaces are no longer
just backgrounds, they are
places where life happens.**

Modern Outdoor Architecture

THOUGHTFUL Outdoor Design Built for Real Life.

At Lumina Collection Group, we believe outdoor spaces deserve the same level of care, intention, and design integrity as interiors. Our work is guided by a simple principle: outdoor structures should be functional, visually refined, and built to last. We specialize in modern outdoor and architectural solutions, including aluminum fencing systems, pergolas, aluminum wall panels, post columns, and premium surface alternatives. Each solution is designed to perform reliably while maintaining a clean, contemporary aesthetic. We work with homeowners, contractors, designers, and commercial property managers who value durability, low maintenance, and clarity in both design and execution.

www.luminacollectiongroup.com

Engineered for Every Season

Lumina aluminum pergolas are engineered to withstand harsh outdoor conditions — from heavy rain to intense UV exposure — without warping, rusting, or fading. The lightweight aluminum structure allows for wide spans with minimal column support, opening up your outdoor space. Each pergola is custom-designed and fabricated to your exact specifications. Our team handles everything from initial design consultation through final installation, ensuring a seamless experience from start to finish.

SECTION 01

PERGOLAS

Shade Redefined. Light Reimagined.

LUMINA COLLECTION GROUP
www.luminacollectiongroup.com

ALUMINUM PERGOLA SYSTEMS

PERGOLAS

Where Architecture Meets the Open Sky

Our aluminum pergola systems are engineered to do far more than provide shade. Conceived at the intersection of architecture and art, each structure is custom-designed to complement the proportions, orientation, and character of your property.

Frames are fabricated from high-grade aluminum or galvanized steel—square or round, straight or curved—finished with electrostatic powder coating in any RAL colour, wood-grain effect or anodized finish. The result is a permanent, virtually maintenance-free structure that retains its beauty for decades.

Canopy panels are laser-cut from aluminum sheets in bespoke perforated patterns, controlling light, air flow and privacy in perfect balance.

- **Custom Dimensions**
Drawn specifically for your site — no standard sizes.
- **Waterproof Options**
Safety-glass or polycarbonate inserts for wet climates.
- **Integrated LED**
Hidden lighting transforms the canopy after dark.
- **Wind Resistant**
Perforations reduce wind load dramatically.

LUMINA COLLECTION GROUP
www.luminacollectiongroup.com

PERGOLA SYSTEMS

Light, Shadow & Sky

The interplay of sunlight filtering through a precision-perforated canopy creates a living visual experience that changes hour by hour. By varying perforation density, hole geometry and panel arrangement, our designers control exactly how much sky, warmth and breeze reach the space below.

In rainy climates, clear polycarbonate or laminated safety-glass inserts provide waterproof coverage without sacrificing the visual connection to the sky. Entrance canopies are individually studied for facade alignment, drainage and the perfect first impression.

LUMINA COLLECTION GROUP
www.luminacollectiongroup.com

PERGOLA SYSTEMS

Enclosed in Gold, Open to the Sky

Floor-to-ceiling glass walls dissolve the line between indoors and out. Gather around a living flame as palms sway beyond your gilded frame — shelter redefined for those who refuse to compromise.

When Night Falls, the Room Begins

Louvered warmth above, a flickering screen ahead, and the grill already singing. Your outdoor living room doesn't close at sunset — it awakens. Engineered for the hours worth staying up for.

A Circle of Light, a World of Your Own

Form sculpted into sculpture. The Arch Series surrounds you in amber radiance, cradled by bold geometric lines that command any garden. Not a seat — a statement that your space is unlike any other.

VENTURA SERIES

Clean lines. Timeless Presence.

The Ventura Series is designed for those who appreciate the interplay of clean horizontal or vertical lines with natural light and landscape. Its semi-open profile creates visual interest while maintaining airflow and sightlines to the surrounding environment.

Available in both **horizontal** and **vertical** orientations, Ventura series adapt effortlessly to modern and transitional architectural styles. The durable powder-coat finish resists UV fading and weathering, ensuring consistent beauty across every season.

Nature's Look. Engineered Strength.

LUMINA COLLECTION GROUP
www.luminacollectiongroup.com

Natural Look. Engineered Strength.

Wood-Plastic Composite (WPC) combines the warmth and authentic grain texture of natural timber with the dimensional stability and resilience of engineered polymer. The result is a fencing material that looks genuinely organic while delivering performance far beyond untreated or treated wood.

Lumina WPC panels are UV-stabilized to prevent fading, moisture-resistant to prevent warping and splitting, and completely termite-proof for long-term structural integrity. Available in a range of timber-inspired tones and plank profiles.

- **Weather Resistant**
Handles rain, humidity, frost and intense UV.
- **Splinter-Free**
Safe for bare feet and children's areas.
- **Eco-Conscious**
Made from recycled wood fibre and polymer.
- **Low Maintenance**
No staining, oiling or sealing required.
